

DECO HOOK BOLTS

As anchors go, they're quite basic. But at Deco they're fabricated with the same high quality and stringent standards that characterize every anchor we make.

DECO HOOK BOLTS ARE machined from ASTM A36 hot-rolled steel and yield a tensile strength of 58,000 lbs. psi minimum. They're available in diameters of 1/2, 3/8, 1/2, 5/8, 1, 1 1/4, and 1 1/2 inches, in any length you require. Larger diameters are available upon request. We also offer stainless or galvanized Hook Bolts.

At Deco, hook bolts are not just "punched out" by a machine. We check every tenth hook bolt with a gauge and a nut to ensure proper threading. Both ends of the bolt are then chamfered for safer handling and to allow easy fitting of the nut.

DECO: THE INDUSTRY STANDARD

For more than 50 years, Deco Manufacturing has delivered industrial products that stand the test of time. Our work is rock solid — and so is our reputation. When it comes to your manufacturing needs, trust Deco Manufacturing to get the job done.
